

DATABRICKS BRICKBUILDER SPECIALIZATION

Qubika Earns Databricks Specialization for Communications, Media, Entertainment & Gaming

The specialization is based on a strong track record in the industry

A global leader in gaming

Databricks migration for their 18 million+ customers. Includes rebuilding governance with Unity Catalog in a regulated, real-time environment. Work includes an AI-powered Migration and Governance Agent, built on Databricks.

One of the world's best known media brands & streaming platforms

For their 100 million+ customer base, we used Databricks to build a unified environment for ingestion, transformation, and storage of large-scale data.

A leading U.S. mass media company with broadcast television

Built an AI-powered advertising order processing solution on Databricks, automating document extraction, product matching, and order validation to accelerate advertising operations.

At the Databricks Data + AI Summit

we were proud to deliver an official talk to a packed audience on our work with AI for a global leader in gaming

We also co-hosted with
Databricks the Media,
Entertainment & Gaming
executive dinner
